Profile

Why do I like Programming?

Creating systems means evolving, and I like to be part of the evolution, give something to the world.

That's why I'm trying to get involved in projects that implicate developing programs with the purpose of practicing and continuing to learn new technologies.

What you get?

These are the benefits that you get when add software into your company:

* Procesos digitales que resultan en datos inmediatos para la toma de deciciones.

Creating systems means evolving, and I like to be part of the evolution, give something to the world.

That's why I'm trying to get involved in projects that implicate developing programs with the purpose of practicing and continuing to learn new technologies.
